A Very drusus Game

One day, Lin and her friend Chris were playing a great game of bellydip.

"Chris," Lin said, "this game is stupid. You know what would make it slly, decent?" she asks you.

MADLIBS GAME

About page

ROBA ELHAZLY[My Work](#)[About](#)[contact](#)[Blog](#)

About Me

Find out who I am, where I'm from and what I'm all about.

Who I Am

My name's Roba. I'm currently a student at Coder Academy. I have a passion for coding and problem solving, looking forward to be a full stack developer.

Background

I worked as a teaching assistant after graduating from university with math and computer science bachelor degree. I helped students use basics of programming to solve problems. After that I moved to Australia with my family and had a long break to care for my two lovely children. During that I taught myself a few technologies like javascript, [jquery](#) and [.Net framework](#). I then started studying with Coder Academy to take my skills to the next level.

Design Process:

- Used flex box to maintain a good view for small screens.
- Fixed header at the top as you scroll, easier for users to navigate through the website without having to scroll up.
- Rounded corners for containers.
- Light shadow for images.
- Used forms in contact me page to follow up with users.
- Changing the colors of the links when hovered to give the feeling of clickable items.
- When hovering images of the projects, they zoom out also to give the feeling of clickable items.
- Font size changes for smaller screen to be easy to read.
- All used images were free to use from Unsplash.

Challenges:

- Responsive design.
- Optimizing images sizes.
- What Contents to put in the home page.
- Creating a simple design.
